

TURBOX Technology for JANMAR in Poland

All persons shown on the picture only removed their masks for taking this photo.

Right at the beginning of 2021 BAHMÜLLER installed the first TURBOX Speciality Folder Gluer in JANMAR CENTRUM Trzcinica, Poland. We are happy, that the final decision was made for BAHMÜLLER.

The TURBOX is equipped with quality inspection system and single box ejection system and can be extended by a POWERPACKER at any time.

BAHMÜLLER is proud to have installed a machine in the future-oriented JANMAR CENTRUM as the Polish market is growing and we are happy to be part of it with already 15 TURBOX references in Poland.
