

Expansion of production capacity at our headquarters in Plüderhausen

Plüderhausen, 28.03.2018

Wilhelm Bahmüller Maschinenbau Präzisionswerkzeuge GmbH was founded in Plüderhausen more than 70 years ago. Since then, the product portfolio has continuously developed and today ranges from the three divisions of precision grinding machines for fine machining of small components, to fully automated and linked processing lines for corrugated packaging, to individual precision tools modern machining centers.

BAHMUELLER with its three highly specialized business segments ranks among the market and technology leaders worldwide and has developed a strong market position in recent years.

Order intake has grown steadily over the past 3 years. In 2015 an order intake of EUR 68 million was realized, and a turnover of EUR 87.2 million is planned for 2018. This corresponds to a total growth of 28% in three years with an average annual growth of 9.3%, which is significant more than the average growth in the mechanical engineering sector.

This positive development can also be seen in the number of jobs. In 2018, the number of employees is expected to rise from 326 to 356. In the field of apprenticeship, the number will increase by 43% in 2018 from 18 to 27 trainees.

The ground-breaking ceremony on 22.03.2018 laid the foundation for the expansion of the production and assembly areas and documented the successful development of the last 3 years. The completion of the new building is planned for August / September 2018.
