

PRESS RELEASE**BAHMÜLLER –MILESTONE
MARKET LAUNCH TURBOX XL**

TURBOX is a brand in the market since more than a decade now.

Now Bahmüller launched its new TURBOX XL - operating width of 3200mm or 125”.

Strong demand from the market led to this decision.

Equipped with second-to-none BOXFLOW@CONTROL and UNIQUE FOLD - TURBOX XL is ready for the field.

Customers from all over the world showed up to see the inauguration of the TURBOX XL.

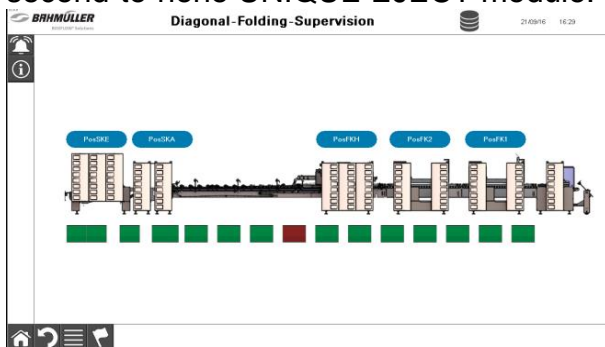

Contact: Stefanie Barz, phone: +49 7181 809-419, Stefanie.Barz@bahmueller.de

BAHMÜLLER main target is to offer an overall sophisticated solution and part of it is the recently developed DFS – Diagonal Fold Supervision – another contribution to ZERO-DEFECT-DELIVERY.

With the latest generation of BOXFLOW®CONTROL TURBOX can be equipped with a unique sensor kit positioned in Dynamic Fold II. The sensor block detects torn flaps and even misfolded flaps, by measuring the length and height.

Faulty products will be ejected in the second-to-none UNIQUE EJECT module.

TURBOX XL #1 will make its way to the customer during summer this year.
